

Proficiency *Feature-based CAD Conversion*

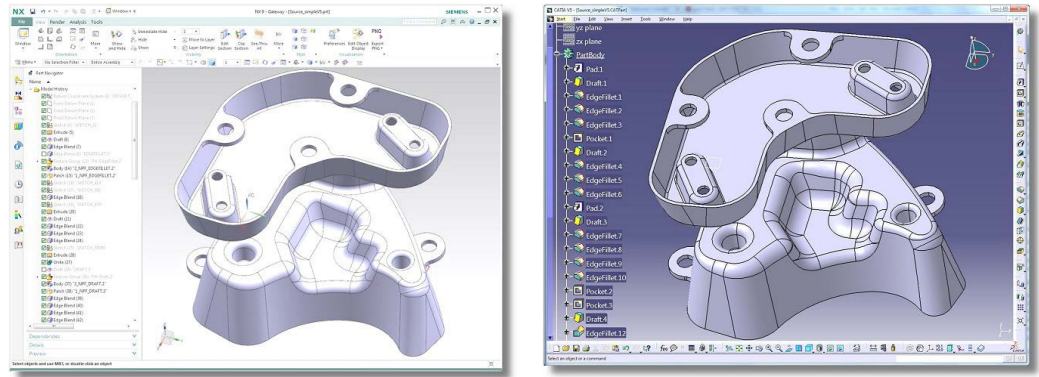

The Proficiency feature-based CAD translator enables the transfer of complete design intelligence between major CAD systems with up to 100% automation and enhanced efficiency. By providing fully functional models that retain the original product knowledge in the target CAD system, Proficiency maximizes CAD data reuse and offers a reliable basis for further product design and development.

As corporate environments evolve, CAD consolidation provides a business an advantage. Proficiency delivers high-quality CAD models without losing workability or manufacturing data. The conversion process preserves design history and adds value by delivering high quality models in your CAD system of choice.

Native

- CATIA V5
- Creo
- Inventor
- NX
- Solid Edge
- SOLIDWORKS

“ This feature-based exchange technology works. It will pay for itself quickly and it will help us maintain our competitive position in the global automotive industry.”

- Ferruccio Bondesan, Magneti Marelli Powertrain S.P.A.

Data Translation Services

Let ITI handle your CAD data translation project. A full audit of your data provides a detailed assessment of the items included, and the cost to transfer all of your files between CAD formats while maintaining all features and associativity. Following successful conversion, a validation report will certify the quality of the translated CAD files in the target system.

Proficiency Features:

- Automatic featured-based conversion of:
 - Design history
 - Parameters
 - Geometry
 - Sketches
 - Constraints
 - Manufacturing information
 - Metadata
- 3D assembly and model support
- 2D associative drawing support
- Legacy CAD data auditor
- PLM integration support
- Conversion validation technology
- Advanced reporting and Q/A

About ITI, a Wipro company

ITI is the global leader providing reliable interoperability, validation, and migration solutions for product data and related systems. ITI solves complex product data interoperability problems so the world's leading manufacturers can focus on making great products. ITI is a wholly owned US-based subsidiary of Wipro, Ltd, and exists within the Wipro Engineering business. Wipro Engineering provides customers with a platform to innovate and engineer the next generation of products and platforms at scale.
