
ITI NEWS – FOR IMMEDIATE RELEASE

ITI and Wipro Combine to Deliver Premium CAD Conversion Services

Milford OH, April 29, 2024 - [International TechneGroup Incorporated](#) (ITI), a leader in PLM interoperability solutions, and [Wipro Ltd](#), a leading global information technology, consulting, and business process services company, proudly announce the launch of the new CAD Conversion Factory. The Conversion Factory combines ITI's automated feature-based conversion software with a dedicated team of Wipro CAD experts, to offer a comprehensive CAD conversion service that empowers clients worldwide with a solution tailored to their unique needs.

At the heart of the Conversion Factory lies a process automation platform powered by the world-leading Proficiency feature-based CAD conversion software. This patented technology supports the conversion of large data sets of geometry, features, history, sketch relations, manufacturing information, metadata, and assembly information between NX, CATIA, SolidWorks, Solid Edge, Creo and Inventor, and can convert associative drawings along with the linked 3D models in one automated procedure. By providing fully functional models that retain the original product knowledge, Proficiency maximizes CAD data re-use and offers a reliable approach to continue the product design and development activities to enhance the products, while supporting the retention of the legacy design intellectual property and investment.

Proficiency sits at the heart of three CAD Conversion Factories situated in the USA, India, and Israel, where the process automation is bolstered by Wipro's experienced design team and CAD experts, who undertake manual completion and quality assurance work, to deliver CAD models 100% to specification. The Conversion Factory ensures effortless transitions between CAD platforms, setting new benchmarks for speed, accuracy, and reliability.

"ITI's CAD conversion services represent the pinnacle of conversion excellence, and being part of Wipro enhances our ability to deliver unmatched value to our clients," commented Cecil Lewis, Business Development Manager at ITI. "The Conversion Factory, based on our highly advanced featured-based software technology and supported by our experienced CAD design team, offers turnkey conversion services for large-scale migrations, ranging from fully automated conversions to automated conversion with manual post-processing, or complete manual creation."

A key part of the Conversion Factory is the automatic validation of results using ITI's CADIQ solution, ensuring the highest standards of quality and precision throughout the conversion process. This methodology not only accelerates project timelines but also significantly reduces costs, making CAD migration faster and more cost-effective than ever before.

“The acquisition of ITI by Wipro has enabled us to expand our service offerings and provide clients with a comprehensive solution for their CAD conversion needs,” added Andy Chinn, Managing Director at ITI. “With Wipro’s extensive resources and global reach, ITI is uniquely positioned to deliver transformative results, driving business growth and innovation for our clients.”

ITI's CAD Conversion Factory represents the culmination of decades of expertise and innovation, delivering unparalleled value to clients across industries. From automated conversions with manual completion to complete manual migration, ITI and Wipro now offer a spectrum of services designed to meet the diverse needs of modern businesses.

About ITI, a Wipro company

ITI is the global leader providing reliable interoperability, validation, and migration solutions for product data and related systems. ITI solves complex product data interoperability problems so the world's leading manufacturers can focus on making great products. ITI is a wholly owned US-based subsidiary of Wipro, Ltd, and exists within the Wipro Engineering business. Wipro Engineering provides customers with a platform to innovate and engineer the next generation of products and platforms at scale.
