ITI Solution: PDM/CAD to PLM Migration for Siemens PLM Software

Source PDM Systems

- Agile
- CMS/Product Center
- Enovia V6
- ePDM
- Matrix
- ProIntralink
- ProPDM
- SmarTeam
- Teamcenter Enterprise
- Vault
- Windchill/PDMLink
- Unmanaged files on disk

"The migration far exceeded our expectations. We were just talking about how we have had absolutely no hiccups due to the migration. We have done many migrations and none have gone this good."
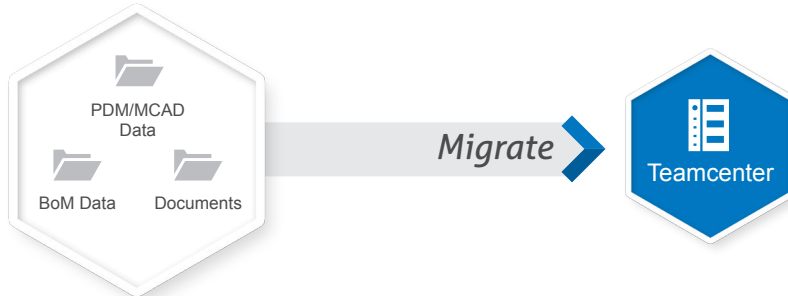

- Industrial Controls OEM

About ITI

ITI is the global leader providing reliable interoperability, validation and migration solutions for product data and related systems. Our customers recognize the value in having a trusted solution partner that provides more than just software. ITI solves complex product data interoperability problems so that the world's leading manufacturers can focus on making great products. You need to keep your engineering initiatives moving forward.

Experts in Teamcenter Migration

PDM/MCAD Data / BoM Data / Documents → Migrate → Teamcenter

When you have a complex PLM migration project, you need an experienced partner. ITI has a team of dedicated professionals who are PLM and CAD experts focused on PLM data migration. We have completed more than 100 production PLM data migration projects. Because we develop PLM/CAD and ERP integrations under vendor/OEM agreements with several major PLM vendors, we are uniquely qualified to become your migration solution partner.

Data Migration Goals and Challenges

- Transition to Teamcenter with minimal disruption
- Replace one or more legacy systems with Teamcenter
- Transform and map the legacy PDM data, ensuring migrated data conforms to Teamcenter rules
- Minimize migration data set to only the required data
- Incorporate data from other systems to reconcile revisions or synch with released drawing images
- Execute production migration over a weekend
- Archive all legacy PDM data and turn-off the legacy PDM system or systems

ITI's powerful automated migration solutions help keep your good ideas moving

- Data preparation and cleanup reports ensure migration readiness
- SaaS technology approach enables 24/7 analysis and test, with quick updates for the migration solution
- Fast database import/export tools
- Unique, iterative process strategy of test, verify and fix
- Migration configurable solutions feature advanced mapping capability for:
    - Incremental migration option
    - Duplicate item reconciliation
    - Pending rename resolution
- Extensible and open architecture
- Legacy PDM archive provided

PLM Data Migration: *Project Approach*

Migration and Implementation Planning	Detailed Requirements	Development and System Test	Customer Testing and Production Migration
Phase 0	Phase 1	Phase 2	Phase 3
